## EDUCATION

| Degree           | Institute                               | Board       | CGPA/Percentage     | Year    |
|------------------|-----------------------------------------|-------------|---------------------|---------|
| B.Tech. (Elec)   | Indian Institute of Technology, Jodhpur | IIT JODHPUR | 8.38 (Till 5th Sem) | 2022-26 |
| Senior Secondary | Mahesh Public School , Jodhpur          | CBSE Board  | 87.6%               | 2021    |
| Secondary        | Mahesh Public School , Jodhpur          | CBSE Board  | 86.6%               | 2019    |

## PROJECTS

### Full-Stack Project: Anonymous Messaging App

- Technologies Next.js, MongoDB, NextAuth, Tailwind, ShadCN, GROQ API
- Implemented user authentication and URL generation for message sharing.
- Developed functionality for anonymous message sending and receiving.
- Added options for users to choose message reception settings based on user login status.
- Integrated GROQ API for suggesting questions to users.

### Full-Stack Project: Vaani: Speech-to-Speech App

- Deepgram, Groq, LiveKit, MongoDB, Azure, Python
- Integrated Deepgram API for speech-to-text conversion.
- Utilized Groq for generating responses.
- Utilized Azure Speech services for text-to-speech.
- Leveraged LiveKit service for real-time communication and seamless integration.
- Currently used by 30 active users for speech-to-speech communication.

### Machine Learning Project: Captioner

- Streamlit, TensorFlow, Python
- Developed an image captioning app that uses a pre-trained VGG16 model for feature extraction and LSTM for text generation.
- Built an intuitive web application using Streamlit for uploading images and displaying captions.
- Ensured scalable and efficient model integration in the application.

### Full-Stack Project: Deployer: Microservices-Based Deployment System

- Next.js, Microservices, Redis, S3
- Developed a scalable platform for deploying Vite React projects using microservices architecture.
- Implemented GitHub OAuth, continuous deployment, and Redis-based inter-service communication.
- Integrated S3 for storage and ensured reliable build pipelines.
- Designed a clean frontend for deployment tracking and management.

## SKILLS

- **Languages** Java, Python, JavaScript, TypeScript, SQL, MATLAB
- **Technologies** React.js, Node.js, Next.js, Django, Flask, REST API, WebSocket, LiveKit, Streamlit, Redis, Docker, MongoDB, PostgreSQL, Tailwind CSS, nginx
- **Tools** Git, Docker, VS Code, Azure Speech Services, TensorFlow, Jupyter Notebook
- **Platforms** AWS, Vercel, Ubuntu

## KEY COURSES TAKEN

- **Completed:** Introduction to Computer Science, Data Structures and Algorithms, Probability Statistics and Stochastic Processes, Signal and Systems, Engineering Mathematics I & II, Pattern Recognition and Machine Learning, Digital Design, Physical Electronics, Computer Architecture, Analog Circuits, Control System, Communication Systems

## ACHIEVEMENTS

- **Grade A in Introduction to Computer Science**
- **Solved 500+ LeetCode Questions**
